LESSON 2

Subject	Social Studies, History and ICT
Lesson Title	MIGRATIONS HOW TO ARISE AWARENESS THROUGH PLAYING A GAME WHILE PRACTICING DEBATE.

Lesson Objectives

Choose, configure and programme digital devices depending on the task being performed (C1) Use text editing, multimedia presentations and spreadsheet applications (C2)

Produce a cards game based on different situations that could be associated to democracy or that happen in democracy while they are considered to be not so democratic

Description

Each card is a universe in itself. On the backside, there is always a sentence or image related. This sentence is the one to be commented by the group and they have to reach an agreement as it can be associated to a democratic society or not.

Preparation

To produce the cards you must go to: http://www.hearthcards.net/. You have to add the related picture and the sentences to be debated.
You have to print and plasticize them.

Summary of Tasks/actions

Students are given some examples on different situations and they must discuss if these can be observed in democratic societies or not.

They brainstorm to gather a battery of images and sentences to be used to produce le cards. Ten per group

They are introduced to the usage of the program to produce the cards.

They go through the process of creating and producing the cards

They use them in class to practice debating and discussing and then they present their deck of cards to other classes so we spread the game.
During the Erasmus + week an exhibition will be organized to share, compare and extract global information about migration movements in Europe.

Assignment

We meant the game to raise awareness on how tricky the concept of democracy can be for real. One thing is the theory another one is the reality we may find in our daylife.

Materials / Equipment

History course book and newspapers

Teacher provided different options to create the posters:

● http://www.hearthcards.net/

Use of the computer facilities of the school
We also used this presentation on Capsules to produce different types of materials taken from the official webpage of the Education Department. Even it is written in Catalan it will provide useful links to apps and programs http://www.edu365.cat/capsules/index.html
